Burke Station Road Project Detour Notification

Please be advised that the Burke Station Rd. improvement project will begin on August 2, 2017 and will be completed within a year. The project involves construction of a new storm drainage system, curb and gutter, sidewalk and paving on the west side of Burke Station Rd.

Beginning the week of August 15, 2017, and lasting approximately two weeks, Burke Station Rd. southbound traffic will be detoured between Main St. and Stoughton Rd. All southbound Burke Station Rd traffic should utilize the signed alternate routes shown on the map located on the back of this flyer. Northbound Burke Station Rd. traffic will not be impacted. Please note the detour will be in effect for approximately 2 weeks.

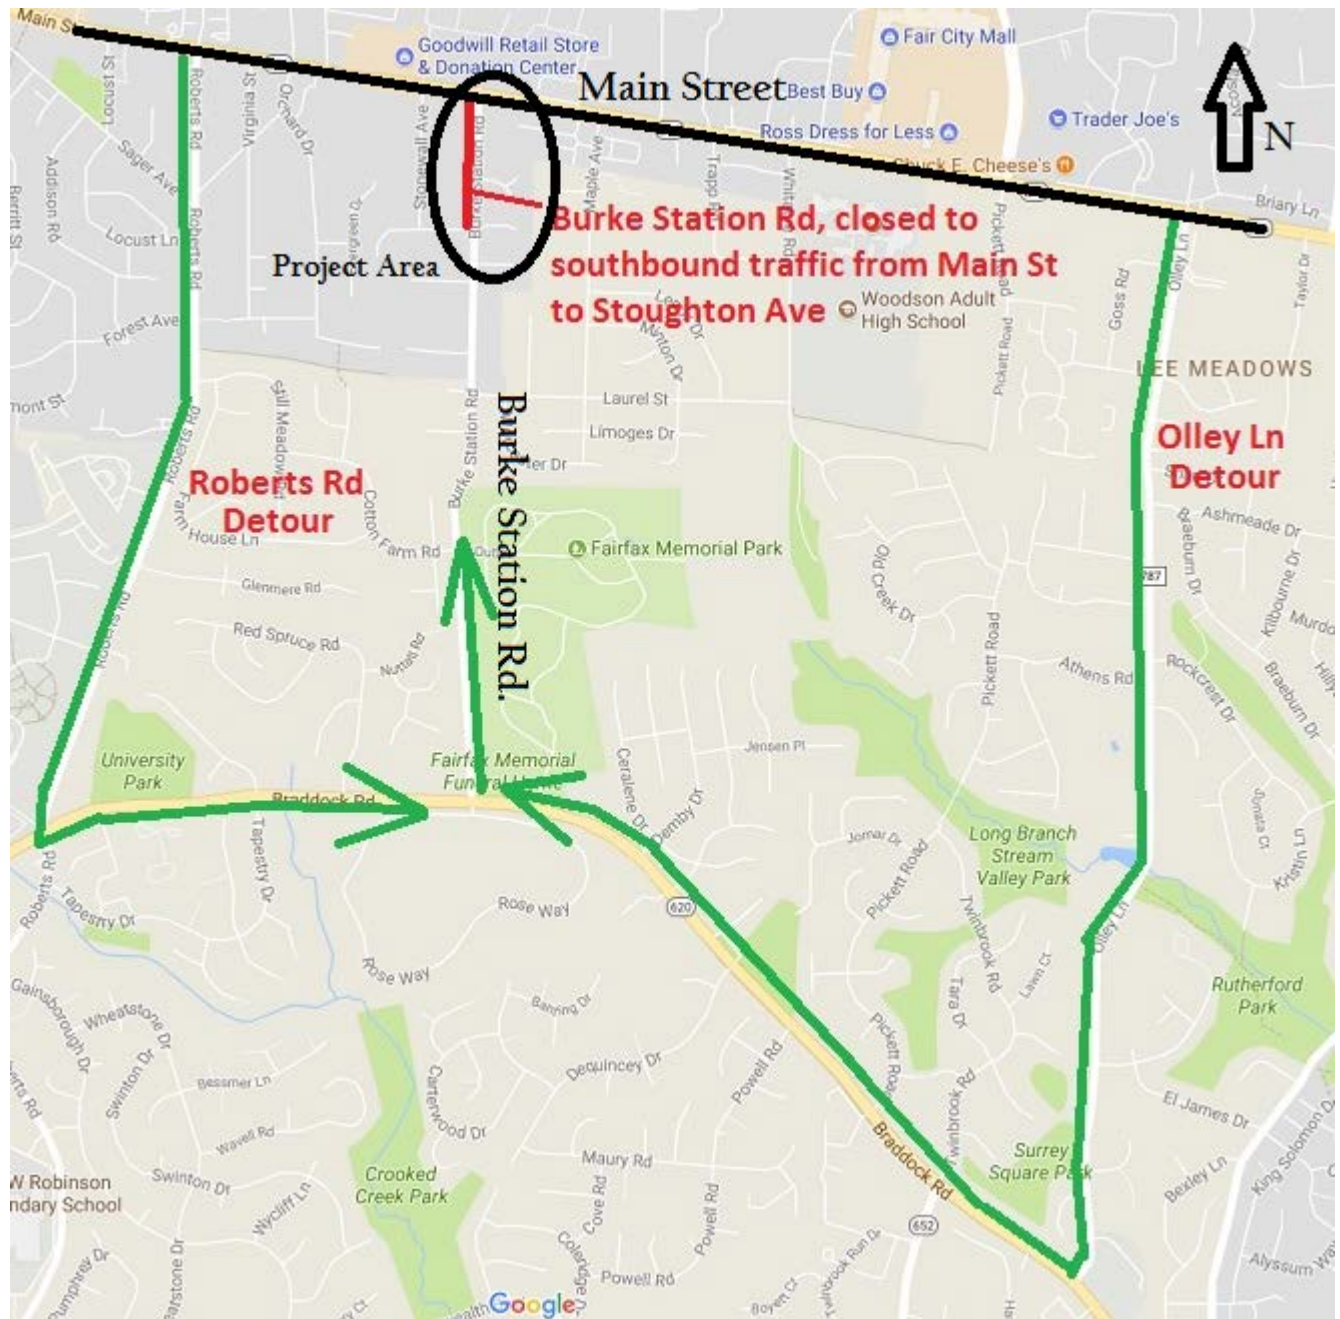

For more information on the project please visit the City website page at:
<http://www.fairfaxva.gov/government/public-works/projects>.

Please be advised that this work may require Miss Utility to mark underground utilities in and around the work area, as required by the Virginia Underground Utility Damage Prevention Act. Utility location marks will be made with either temporary paint or flags on public roadways and sidewalks, private driveways, as well as in grass areas both on public and private property. Markings are for location identification only and do not indicate locations of excavation. Miss Utility often marks beyond the limits of the work area for safety and reference purposes. Miss Utility markings may be repeatedly refreshed until work is completed in that particular area. The City has no control over Miss Utility marking requests. For more information on Miss Utility, please see www.MissUtilityOfVirginia.com
